

**GOOD SAMARITAN HOSPITAL- MADONNA AND EAST WING
DEMOLITION**

Dayton, OH

Scope of Work:

Selective Demolition, Structural Demolition

Project Detail:

This project included the mass demolition of two wings of an active hospital. A vertical separation was performed utilizing sawing and hand demolition techniques to allow for a smooth transition for the new addition demolished. The project required a floor by floor selective demolition approach along the exterior wall and column bay directly adjacent to the occupied one-story building. This administrative building was less than seven feet from adjacent five-story building being demolished.
